

# RELIEF | *The Changing Landscape of Axial Spondyloarthritis:* CURRENT AND EMERGING AGENTS for INDIVIDUALIZED TREATMENT

**WELCOME TO AUGMENTED REALITY...**  
**a tour in the palm of your hand!**

This augmented reality application was created using images and animations to highlight aspects of the diagnosis, clinical manifestations, and treatment of axial spondyloarthritis (axSpA). In particular, this video allows you to focus on the inflammatory processes of axSpA, as well as the bone remodeling and pain associated with the disorder. The therapies mentioned are linked to up-to-date clinical data supporting their safety and efficacy. This tool can be used to enhance peer-to-peer, physician-to-patient, and physician-to-caregiver discussions.

The images and animations that are brought to reality can be manipulated and controlled by **YOU**, allowing you to focus on specific areas and be truly engaged in the learning tool.

To use this augmented reality application, please download the **“relief-AS AR”** app from the Apple App Store or Google Play Store on your phone or tablet.

## INSTRUCTIONS

---

- Press the start button, and slowly move your device to scan the area around you
- Once a flat surface has been found, you will see a marker appear
- Move your device to reposition the marker, and tap the screen when you are ready to begin
- Try rotating your device to landscape mode for a wider view
